

AMENDMENTS TO THE SPECIFICATION

Please replace the present title with the following amended title:

PORTABLE TERMINAL WITH MOBILE CAMERA PHONE WITH ADJUSTABLE
FOCAL LENGTH

Please replace the paragraph on page 3, beginning at line 19, ending at line 24 with the following amended paragraph:

Preferably, the portable terminal with camera further comprises another conversion lens changeable with said conversion lens by sliding operation, wherein the focal length of the image pickup device is converted into one of a plurality of lengths by selecting one of the conversion lenses. If the plurality of conversion lenses are provided and can be changeably moved as described above, the focal length can be converted into one of the plurality of lengths to provide modes such as a telephoto, standard, and wide-angle.

Please replace the paragraph on page 5, beginning at line 2, ending at line 4 with the following amended paragraph:

The above arrangements are similar to those of the presently most common ~~portable~~ portable terminals on the market. Accordingly, further description of the constituent members is omitted.

Please replace the paragraphs on page 6, beginning at line 6, ending at line 14 with the following amended paragraph:

The digital camera 50 contained in the portable terminal 10 is composed of the image pickup section 52, having the lens 52A and the image pickup element such as the CCD 52B which is behind the lens 52A, as shown in Fig. 3, an image memory 54, a compression and decompression processing section 56, the image display sections 16 and 46, the conversion lens 60, the controller 24, the key input section 26, and other sections.

The display sections 16 and 46 of the portable terminal 10 also ~~serves-serve~~ as the image display section of the digital camera 50, and the controller 24 and the key input section 26 of the portable terminal 10 also ~~serves-serve~~ as the controller and the key input section of the digital camera 50.

Page 8, second full paragraph, delete in its entirety, and replace with the following:

As shown in Fig. 7(b), the image pickup section 52 of the digital camera 50 is arranged at a position corresponding to ~~one-third~~ one-third of the length of the first housing 30 from its upper end and in the right of the first housing 30. The conversion lens 60 is arranged at the corresponding portion of the second housing 40. The image pickup section 52 of the digital camera 50 and the conversion lens 60 are arranged so that the image pickup section 52 and the conversion lens 60 have substantially the identical optical axis when the second housing 40 is laid on the first housing 30 as shown in Fig. 7(a).

Page 8, last paragraph, (spanning pages 8 and 9), delete in its entirety, and replace with the following:

Description has been given of the embodiments of the portable terminal with camera according to the present invention. The present invention is not limited to the above embodiments but various other embodiments are possible. For example, in the embodiments shown in Figs. 1 and 6, the conversion lenses are of a fixed focus type. However, it is possible to employ a configuration in which one of the conversion lenses is a zoom lens. It is also possible to employ a configuration in which an image pickup section using no conversion lens is set in a close-up or wide-angle state, and a conversion lens is used to provide the image pickup section 52 with a longer focal length.
